

PRESS RELEASE

June 3rd, 2010

Capture works with The Travel Library for new site launch

The Travel Library is one of the UK's leading independent sources of high quality travel images, and has been a long-term user of Capture systems. Recently the company wanted a bespoke front-end developed for the greetings card, calendar and poster market (www.ttl-plus.com). Capture undertook the work – and the result was a delighted client.

Chris Penn, Production Manager of The Travel Library, said: "I could not have guessed that my seemingly impossible designs for TTL Plus would have become a reality in such a smooth, well managed and successful way. The company's skills are outstanding. If we are successful with TTL Plus then Capture is surely part of that success. It's been a great project all the way through because of the great communication and quick actions."

Managing Director Philip Enticknap said: "We have a long-established relationship with Capture. They understand our needs and can deliver excellent work on time, to a tight deadline. Capture is a company we can trust, where loyalty, integrity and a high-level of professionalism walk hand-in-hand."

Capture Managing Director Abbie Enock said: "Chris is creative, yet also logical, methodical and clear in expressing his wishes. These qualities – and TTL's outstanding imagery – have made it a pleasure to work on this project."

A major part of the development team's work is devoted to the new revolutionary web-based Capture 2.2 digital asset, business, and e-commerce solution that can dramatically streamline workflows, saving time and money.

The Capture customer-base is growing in the UK, US and Europe – and the company's latest systems will be on show next week at CEPIC Congress at the Aviva Stadium, Dublin from June 9 to June 13, 2010. Capture and sister agency LatitudeStock (www.latitudestock.com) will be at Table 59 - and delighted to show delegates cutting edge software systems that could help change the future of their business.
